

Contractor's Health & Safety Plan for Construction Projects Guidelines

G-001-20
Rev 00

I. **Purpose**

In order to streamline and standardize the safety requirements at our construction project sites, the guideline is issued by the Group H&S team

II. **Responsibility**

- a. The implementation of this guideline is the overall responsibility of the Project Manager or the project head under whom the construction project is being executed.
- b. Safety Head of the project will appraise the construction head on these requirements and facilitate compliance.
- c. It is mandatory that all Contractors must submit a project specific safety plan before the start of the project. Project Safety plan must be approved before start of the related works.
- d. Group H&S team is the custodian of this guideline and shall review this guideline periodically (at least every year) for its relevance and effectiveness.

III. **Safety Plan – Minimum Contents Template**

Contractor Name		Project Name
